

WHY CHOOSE CONCRETE CHIROPRACTOR®

Experience

Dating back to 1979, our extensive commercial and residential concrete background makes us Tradesmen, NOT salesmen.
The Trusted leading experts in concrete raising since 2000!

Commitment

Our second generation, family-owned and operated company continues to grow as the most reputable name serving the Tri-State area. Other companies may offer concrete raising as a sideline; at Concrete Chiropractor®,
Concrete raising is our business!

Results

By preventing costly concrete replacement, Concrete Chiropractor® has resolved countless concrete issues for our customers, thereby reducing liability concerns and restoring property values. We can confidently claim,
"Thousands leveled, millions saved!"™

Material

Concrete Chiropractor® uses a lab tested, 100% natural, environmental-friendly, earth material chosen for its compressive strength. Others in the industry use a petroleum or chemical-based product that concrete recycling facilities are unable to accept. A MSDS, or a material safety data sheet, shows flammability, carcinogenicity, toxicity, and reactivity of the materials.
When comparing contractors, ask for their material safety data sheet!

Price

Since 2000, Concrete Chiropractor® has quoted and completed thousands of successful jobs. Using our years of experience, we confidently and efficiently quote a fair price for a quality, warrantied job that we stand behind.
You can only base a "good price" on job completion results, or when your warranty is honored!

Warranty

Warranty claims made by others in the industry may be too good to be true. It is hard to believe warranty promises that extend longer than the contractor has been raising concrete. Contractors should provide customer contacts for return work made
under their warranty period.

At Concrete Chiropractor®, we offer a No hassle or gimmicks warranty and have the customer base to prove it!
